

Plug-and-play AI-driven containerized solutions for financial compliance, fraud detection and alerting on Google Cloud

Service Overview

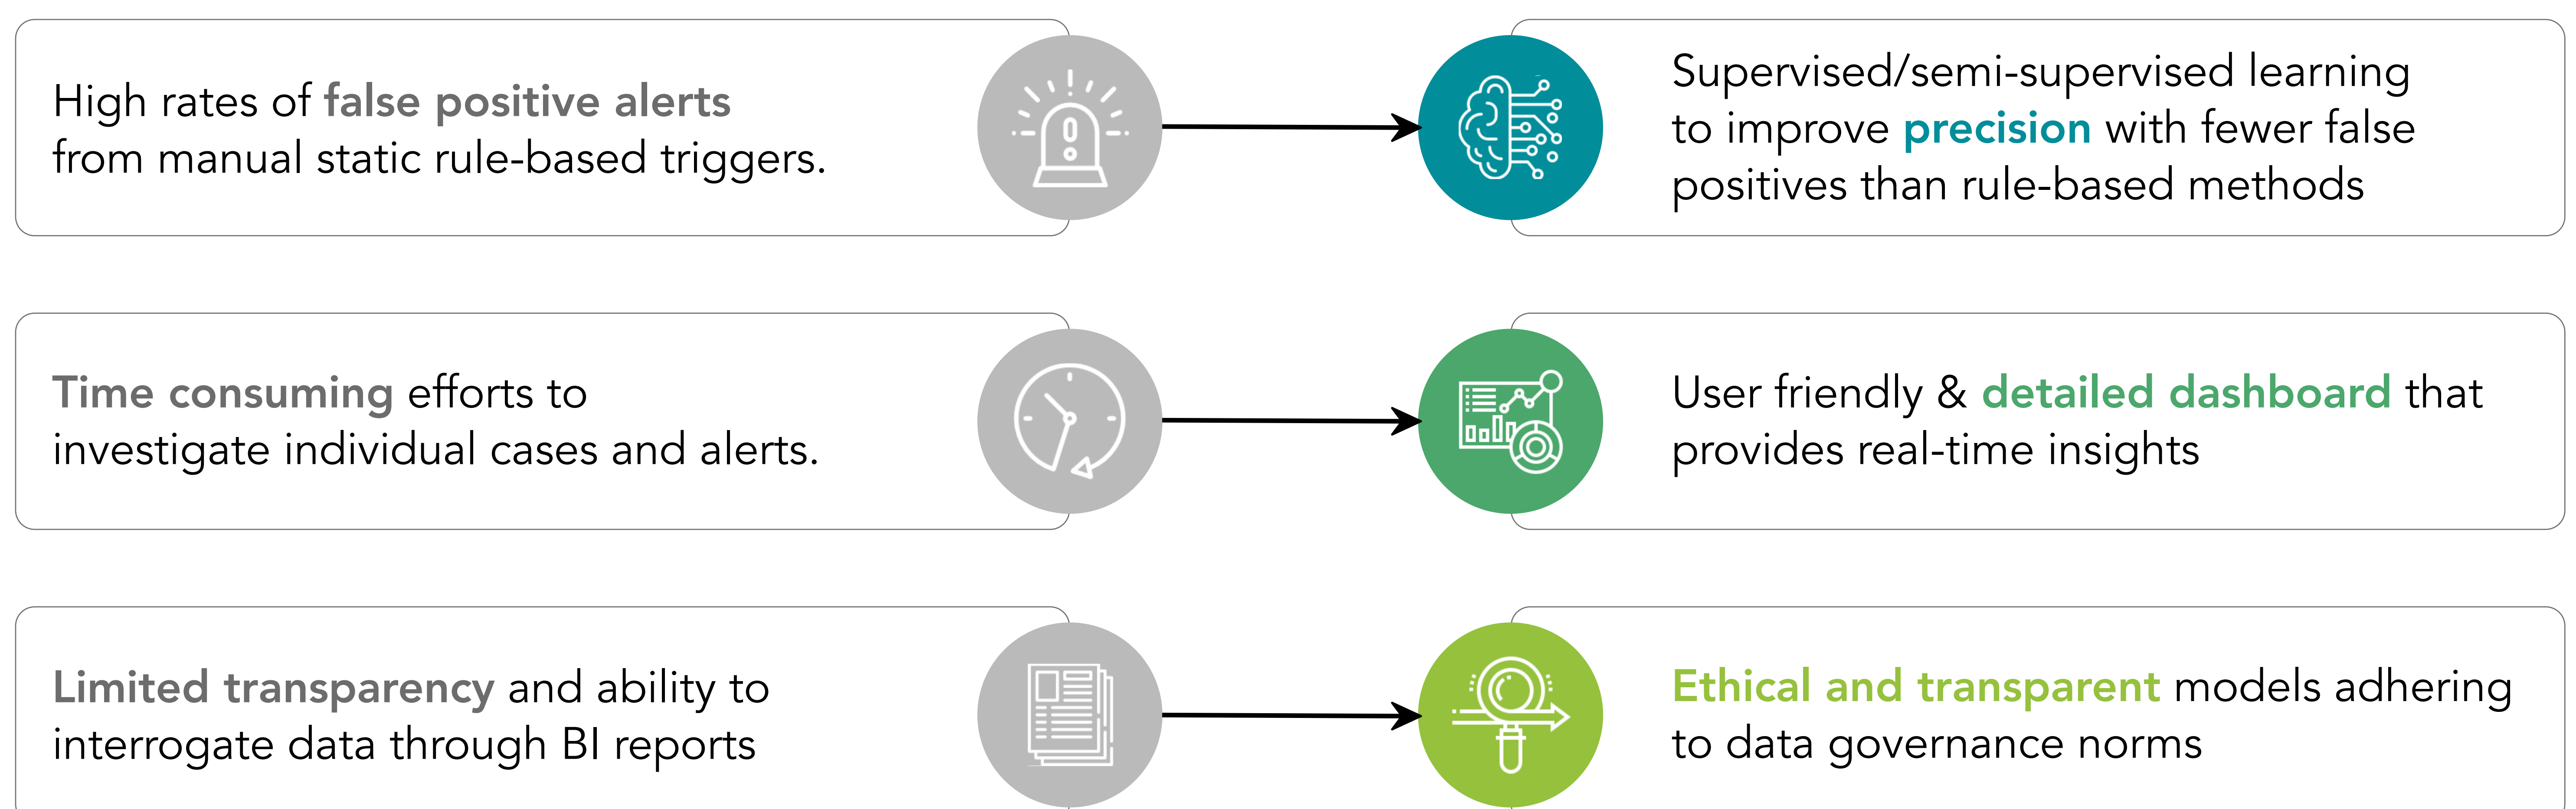

A solution for financial compliance that is fully customizable to your data governance needs to ensure data privacy, security, and reliability. Our fraud intelligence systems provides predictive insights for detecting anomalous patterns in payments processing using pre-trained AI to score transaction level fraud risk. Our solution can be applicable to a broad range of payment modalities, from e-commerce to mobile banking.

Techolution's containerized solution architecture allows easy deployment on-prem & the cloud.

Risk detection dashboard with risk-based detection score and transparent results to enable timely report and intervention

Predictive Analytics AI Fraud Detection on Banking Payment Processing

Techolution Value Propositions

Access to our AI center of Excellence

Leverage top AI / IoT talent including published data scientists and AI specialists with expertise in deep learning and GPU computing for data science, signal / image processing, etc.

Continuously Integrated Dev Support for R&D

Techolution provides managed agile/scrum teams equipped with developers, Cloud DevOps / MLOps experts and quality assurance

Project Management and Subject Matter Expertise

Our R&D-as-a-service engagement model includes a dedicated project manager and a subject matter expert to translate requirements into functional development stories

Techolution's fraud detection and alerting systems provides real-time analytics with seamless configuration.

Techolution's AI solutions are less risky than leveraging internal resources. Save on costs with outcome-based billing.
