

# Techolution Asset Monitoring for Cash Machines

SOLUTION BRIEF

Taking your business to the cloud and beyond!

To provide the best service to your customers you need to keep track of the health of the cash machines, adhere to service SLA and remotely control the machines. Techolution's proven solution helps you to achieve it.

## Salient Features

- Intuitive representation of important KPIs
- Remote desktop connectivity, script and command execution
- Decision tree to identify root cause of failures
- Predictive analytics to prevent failures and downtimes
- Works even when machines are behind a firewall. Only a few domains to be whitelisted
- Remote two way file transfer and collaboration features for quick troubleshooting

## Why Techolution's Solution?

- 01 Improved operational efficiency by 73% and time taken to find root cause of failure by 80%
- 02 SOC2 compliant for security standards
- 03 Serving over 25,000 + Machines in the cash machine management platform
- 04 Flexible pricing model. Monthly subscription plan based on number of machines
- 05 Easily Integrated with internal systems (ERP, CRM etc) and machine softwares
- 06 Minimal dependency from your team. We take care of both agent software and cloud platform
- 07 Customizable reports and analytics

## Differentiators

- Trusted by Industry leaders and used by major retailers in the USA!
- Upcoming features like Causal Digital Twins, virtualization etc available as part of the plan
- Can be hosted on-premise or on the cloud of your choice.
- Works along with your softwares on machines
