

**Free your team to work on other projects while we minimize downtime & technical issues.**

**Reasons to partner with Techolution:** You have a lot of priorities that rely on Cloud. They may include global and remote workforce applications and collaboration, IoT platform and data management, AI/ML and data analytics and Application development and management. You want to maximize the business benefits of cloud but you may not have the resources in-house to do so.

## Services Overview

**Plan, build & monitor** - We'll bring our expertise to your cloud infrastructure and systems

**Manage Applications** - We'll ensure uptime and compatibility across on-prem and cloud environments

**Automation and DevOps** - We'll create management frameworks for apps, workloads and databases within a cloud stack

**Security and Risk management** - We'll manage cybersecurity, governance, risk and compliance.

**AI and IoT** - Transparent management of data, usage and consumption

## Techolution Value Propositions

### Keep Your Customers Happy

We'll Tackle downtime & other problems even if they're not on our systems so that you don't lose revenue.

### Cut Your Cloud Support Costs

We'll embed a local expert on-site so that **you don't lose another minute** to the problem.

### Save Time & Money When Selecting Your Cloud

We'll train your team & build your in-house skills so that you can reduce your managed services costs.

### Stop Waiting for Tech Support

Our experts are available 24/7 so that you can tackle downtime during off-hours & holidays.

### Tackle Downtime at Any Time

We'll help you pick the cloud platform that uses your skills & environment no need to restart from scratch!

### Let us help you with these:

- Cloud Migration Services
- Network services
- Security planning / cloud monitoring
- Cloud native apps, containerization & micro services
- AppDev, DevOps and GitOps
- AI and develop data analytics environment development

### The Buck Stops Here - Our Commitment

We don't just notify you when there is a problem.

We do whatever it takes to solve it!
